Downloading jQuery

Compressed and uncompressed copies of jQuery files are available. The uncompressed file is best used during development; the compressed file saves bandwidth and improves performance in production. You can also download a [sourcemap file](#) for use with a compressed file. The map file is *not* required for users to run jQuery, it just improves the developer's debugger experience. In 1.11.0/2.1.0 the `//# sourceMappingURL` comment is [not included](#) in the compressed file.

To locally download these files, right-click the link and select "Save as..." from the menu.

jQuery

For help when upgrading jQuery, please see the [upgrade guide](#) most relevant to your version. We also recommend using the

[Download the compressed, production jQuery 3.6.1](#)
